New Delhi, India

EDUCATION

- **Dr. Akhilesh Das Gupta Institute of Technology and Management** New Delhi, India
Bachelor of Technology - Electronics and Communication; GPA: 8.63 *December 2020 - July 2024*

SKILLS SUMMARY

- **Languages:** C/C++, JavaScript, TypeScript, Java, Python
- **Front-End Development:** React.js, Next.js, React Native, Redux, Webpack, Vite
- **Back-End Development:** Node.js, Express.js, SQL, MongoDB, Apache XAMPP, Flask, Sockets, Redis
- **Tools + DX:** AWS, Firebase, Docker, Postman, Twilio, Vercel, PlanetScale, Supabase, Apache

EXPERIENCE AND INTERNSHIPS

- **PaperBrain** Remote
Founder *Nov 2022 - Present*
 - Our platform offers an optimized interface for easy access to research papers. We provide an AI-powered assistant, fueled by GPT, to help users understand research papers on the fly.
 - With 50,000 users and consistently over 100 Daily Active Users, our platform has gained decent popularity among researchers and academics.
- **Shikha Labs** Remote
Software Engineer *Nov 2023 - Feb 2024*
 - Shikha Labs is an AI technology company creating cutting edge educational products for students, teachers and schools to leapfrog learning and teaching for the future.
 - Developed products and tools to bridge the gap between education and AI along with handling the full stack code across various other products.
- **Polymath AI** Remote
Full Stack Developer *July 2023 - Oct 2023*
 - Polymath AI develops teaching tools that empower teachers to plan lessons, create worksheets, design assessments, provide personalized feedback, and do more.
 - Developed products to help teachers get access to better teaching tools with the help of AI. Developed a selection copilot to automate the process of teacher hiring for 'Teach For India'.
- **GirlScript Summer of Code'23** Remote
Project Admin *May 2023 - Aug 2023*
 - 3-month long Open-Source Program conducted every summer by the GirlScript Foundation.
 - Administered and managed a great project at GSSoC'23. Mentored contributors taking their first steps in open-source.

PROJECTS

- **PaperBrain:** A go-to platform for accessing and understanding research papers. Our platform offers an optimized interface for easy access to research papers. We provide an AI-powered assistant, fueled by GPT, to help users understand research papers on the fly.
Tech: NextJS, TypeScript, Python, Flask, OpenAI, GPT, Supabase, TailwindCSS, Framer Motion
- **CodeHub:** Developed a go-to platform for Software Engineers/Computer Science Students. The users can:
 - Store frequently used code snippets (blocks of codes) for future references.
 - Generate, understand and translate a piece of code (be it in any language).Tech: Node, Express, React, Vite, TailwindCSS, Sanity, OpenAI, GPT
- **LegalAI:** Legal AI is a revolutionary web app that allows you to easily understand legal documents by interacting with them in a natural way. Whether you are a lawyer, business owner, or just someone who needs to understand a legal contract, Legal AI is here to help you understand legal documents with ease.
Tech: NextJS, TypeScript, Python, Flask, OpenAI, GPT, Firebase TailwindCSS, Framer Motion
- **Healthy Eats:** A platform for people who plan to maintain a healthy eating habit. One-stop solution to get an insight about the food you consume and discover recipes that suit your preferences.
Tech: React Native, TypeScript, Python, Flask, OpenAI, GPT, Edamam API

HONORS AND AWARDS

- First Overall and Best Education Hack at MakeUC'22 (organised by University of Cincinnati - IEEE) - Oct, 2022
- Second Overall and Best Design at MetroHacks'22 (one of the largest hackathons in DFW Metroplex) - Nov, 2022
- Best Overall Hack at Hack Concode'22 among 700+ registrations (organised by Concode) - Nov, 2022
- Received the Special mention for Interrupt Innovate Iterate hackathon (organised by IIIT - Allahabad) - Dec, 2022
